MASTER OF ENGINEERING

The Master of Engineering program is designed to provide advanced education in the field of engineering. The program is aimed at professionals who wish to enhance their knowledge and skills in engineering, or who are looking to advance in their careers. It is a two-year program, comprising a total of 90 credits.

The program offers a wide range of courses and specializations in various fields of engineering. Students have the opportunity to choose courses that align with their career goals and interests. The curriculum includes both theoretical and practical components, ensuring a well-rounded education.

Admission requirements for the program include a bachelor's degree in engineering or a related field, with a minimum GPA of 3.0 on a 4.0 scale. English proficiency is also required, and students must demonstrate at least a TOEFL IBT score of 80 or an IELTS score of 6.5.

The program is offered at the Technion, one of the leading institutions in the field of engineering. The Technion is renowned for its high standards of education and research, and its graduates are highly sought after in the industry.

The Technion is located in Haifa, Israel, and offers a vibrant and diverse student body. The campus is equipped with state-of-the-art facilities and resources, providing students with the best possible learning environment.

For more information about the program, including application procedures and deadlines, please visit the Technion's website or contact the admissions office directly.
